Yogishwar Attempt and Ascent of Saife. A 5-man Spanish team led by Fernando Navarro approached from the Shyamvarna Glacier and established camp on the south ridge of Yogishwar (6678 meters, 21,910 feet). However, in late September they encountered huge crevasses and very loose rock on the ridge, which forced them to give up the climb. They climbed nearby Saife (6161 meters, 20,213 feet) from the Swetvarna Glacier on September 19.

Indian Ascents and Attempts in Garhwal. Two Indian expeditions successfully climbed *Gangotri I* (6672 meters, 21,890 feet). The leaders were Dr. Anjan Chowdhury and Debasish Kanji. Sisir Karmaker and Laxman Rana of the first party climbed to the summit on May 25. The second group placed climbers on the top on June 5. There were two successful expeditions to the Jogin group, one led by Vikram V. Jog and the other by Sobat Singh Rana. Both expeditions climbed *Jogin I and III*, the first on July 14 and the second on August 18. R.Z. Rana led a successful expedition that climbed *Shri Kailas* (6932 meters, 22,745 feet). R.Z. Rana, N.N. Rathwa and H.N. Pandya reached the summit. A team led by K.V. Mohan attempted to climb *Trisul* from the west. The 7-member team reached 6400 meters when they were forced to give up due to technical difficulties. An 11-member team led by Kiran Mukherjee was stopped 100 meters below the summit of *Mandani* on September 18 due to a huge crevasse. A team led by Suhas Kharde was trapped at 6900 meters by bad weather for a long period on *Mana Northwest* (7092 meters, 23,268 feet). In the spring, Shyamal Sarkar led a group on *Chaukhamba I* (7138 meters, 23,420 feet). They reached 6800 meters before giving up because of soft snow.
