(Editor's Note: The totals for these columns have been incorrect from 1981. The individual years have been correct, but the totals went awry, resulting in an understatement of from four to over 300, except for total fatalities in Canada, the total of which was overstated by nine. The totals are now corrected. However, if the totals for Table II were added, they would not jibe with this table either. Vexatious, maybe irrelevant.
