

route) and traverse over Mathilde on July 21 by Albanus, Dölker; north-east of this group, P 1790, GE 14 (5873 feet) on skis by Albanus, Dölker, Niebling, A. Schlee on July 11 and 12; southeast of this group, P 1290*, GGE 15 (4233 feet) on skis by Dorka, Frick, Meier, Vlach on July 11 and 12; on the second ridge south of Kanglussuq Glacier and north of Sangmissoq Glacier from east to west, P 1580*, GGE 25 (5184 feet) via northeast face (55° ice) by Meier, A. Schlee on July 20; Sangmissoq, GGE 26 (6759 feet); P 1980*, GGE 27 (6496 feet); P 1800*, GGE 28 (5906 feet); P 1630*, GGE 29 (5348 feet), all five traversed via a new route, the east and west ridges, by Meier, A. Schlee on July 20 and 21; three miles south of Sangmissoq, P 1540, GGE 19 (5056 feet) and three miles due east of P 1540, P 1480, GGE (4856 feet) both on skis by Haase, Hauff, H. Schlee, Strohm on July 17; east of Umingmak Glacier and west of Sangmissoq, from north to south, Quingarssuk, GGE 17 (6260 feet) by Albanus, Dölker, Dorka, Frick on July 17; Aiguille Rose, GGE 30 (5840 feet) on skis by Hauff, H. Schlee on July 21; P 1710, GGE 31 (5611 feet) by Dorka, Frick, Haase on July 22; P 1850, GGE 38 (6069 feet) on skis by Bässler, Niebling, Vlach on July 23; peaks on ridge due south of the tongue of Sangmissoq Glacier, north to south, P 1200, GGE 13 (3937 feet) on skis by Bässler, Hauff, H. Schlee, Strohm on July 11 and 12; P 1350, GGE 1350 (4429 feet); P 1370, GGE 33 (4490 feet); P 1450, GGE 4758 feet) all three on skis by Albanus, Dorka, Dölker on July 27; P 1210, GGE 37 (3970 feet); P 1250, GGE 36 (4101 feet); and Aujassaq, GGE 35 (4167 feet) all three on skis by Meier, A. and H. Schless on July 23. Outstanding were the climbs of the northeast faces of Punta Franz and P 1580 (GGE 25) the mixed climbs as the north ridge of Sangmissoq and the complete traverse of the Sangmissoq group.

ALEXANDER SCHLEE, M.D., *Deutscher Alpenverein, Göttingen*

To the North Pole Solo. The Japanese Naomi Uemura made a solo dog-team trip from Ellesmereland to the North Pole, which he reached on April 30. He was supported by aircraft which then airlifted him back to his base and then to the northern tip of Greenland to attempt a north-south traverse. Another Japanese expedition from Nihon University led by Kaneshige Ikeda also sledged to the North Pole by a route slightly east of Uemura's. They set out on March 12 and three Japanese and two Eskimos got to the Pole on April 27.

Greenland, North-South Traverse, Solo. After his trip to the North Pole, Naomi Uemura left the northern tip of Greenland, Kap Morris Jesup, on May 12 with 16 dogs. He traveled up Independence Fjord to reach the Icecap. He got to Narssarssuaq near the southern tip of the island on August 22 after a solo trip of some 1600 miles.

* First ascent.
