¹This category includes bouldering, as well as artificial climbing walls, buildings, and so forth. These are added to the count of each state and province, but not to the total count, though that error has been made in previous years.

(Editor's Note: There were errors in the U.S. numbers for 1988 for CA, Central, UT/NM, WA, and WY. The corrections are reflected in the cumulative totals. Additionally, the latter do not correlate with Table I for the U.S. because of mixing Practice Cliff statistics in earlier years. Adjustments will be made next year.)
